Labor Market and Social Policies

OECD

SELECTED BIBLIOGRAPHY AND FURTHER READINGS ON INTERNATIONAL MIGRATION

Dear Participants,

Below you will find a selected bibliography focusing on migration trends and policies, as well as on some aspects of the economics of migration : trade and migration, migration and the labour market, migration and development, international migration and the economic crisis. I know that you are very busy but if you could read at least one or two references mentioned in each of the main topics listed in this bibliography, it would contribute to enrich our discussion on international migration.
